

ALLEGHENY COATINGS

APPLICATOR OF HIGH PERFORMANCE COATINGS AND ELECTROPLATING

Applicators of High Performance Coatings:

Dacromet/Geomet - Zinc rich coating for 1,000 hour salt spray resistance

Magni - Zinc rich coating systems for 1,000 hour salt spray resistance

Doerken - Delta MKS family of coatings for 1,000 hours salt spray resistance

RTM 7000 series - Zinc ceramic coating systems for 1,000 hours salt spray-self sealing on P/M

RTM 9000 series - Dry film lubricants, wear and chemical resistance

Whitford - Xylan coatings for lubricity, wear and chemical resistance

Sermagard - Aluminum rich coating for heat and corrosion resistance

Atotech - Zintek coatings for 1,000 hours salt spray resistance

Powder Coating - For corrosion resistance and aesthetics

Chrome Free and ROHS Compliant Coatings - To meet automotive and EU requirements

Zinc Plating - With both hex and trivalent chromate available, rack or barrel

Porosity Sealing/Impregnation - For powdered metal or castings, high temperature capable

Grit Blasting and Shot Peening - For surface modification

Corrosion Testing Services such as Salt Spray, Cyclic, Kesternich

ISO 9001 CERTIFIED

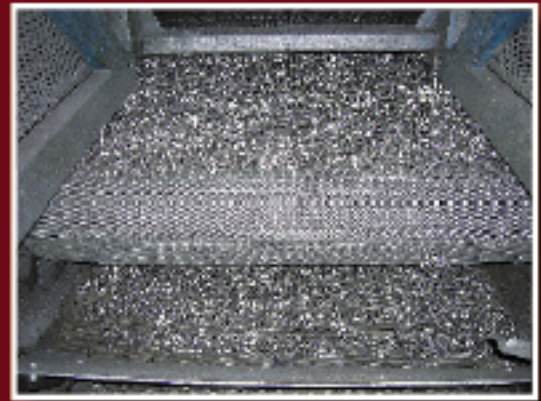

Allegheny utilizes state-of-the-art equipment to provide close control of processing parameters.

X-Ray coating thickness measurement devices provide the ultimate in accuracy. We also use eddy current devices when appropriate.

Barrel plating with processes that are hex chrome free are available.

Dip/spin coating with processes that are chrome free and do not induce hydrogen embrittlement are available.

Singleton cyclical test chamber for automotive standards such as GM 9540P and SAE J2334.

A490 bolts are spray coated with Dacromet, eliminating thread damage that would occur with bulk handling.
